Allurdata® Advantage

Allurdata offers **innovative SaaS technology** that provides access to data and actionable intelligence that their customers can rely on to manage costs, identify optimization strategies and **drive positive results.**

- Leveraging their proprietary asset management system, BizExplorer®, Allurdata meets the needs of **evolving technology** environments and improves return on investment of IT inventory. Enabling facilities to track and manage resources across all locations in real-time ensures duplicate inventory is not purchased thereby maximizing its fiscal value.
- The Allurdata Advantage is accessible to a **range of industries** including healthcare and transportation among others.

“ Allurdata seamlessly ingested and processed over 100 million health claim data records into a new database environment in one day, exceeding all expectations. ”

– Community Health Program Director

Asset Management

Utilizing their warranty maintenance process and the robust BizExplorer® asset management software, Allurdata **tracks inventory life-cycle** — from equipment purchase and warranty updates to replacement and retirement requirements — at the ideal time — delivering **optimized repair** and redeployment for the **least cost**.

The BizExplorer System delivers:

- Comprehensive asset management solutions
- Asset maintenance and financial management
- Accurate and comprehensive reporting
- Optimized asset life-cycle

On-Site AV Maintenance

Allurdata's **expert technicians** use the BizExplorer System to track AV equipment status, monitor warranties and other critical data, via real-time, Microsoft Power BI web portal reporting. Daily conference room AV equipment checks ensure **flawless meeting performance**. Using spare-parts, out-of-service equipment and knowledgeable troubleshooting, Allurdata's technicians **extend equipment usage life**.

Allurdata's On-Site Support provides:

- Day-to-day operations tracking, monitoring and reporting of audio-visual assets
- Equipment maintenance and repair
- Daily audio-visual equipment checks

On-Site IT Support

The Allurdata team provides dedicated, on-site assistance for IT inventory management and immediate IT issues resolution, as well as AV conference set-up and on-site support. Through the development of user-guides and wiring diagrams, they enable staff to handle low-level troubleshooting needs.

Allurdata's On-Site Support provides:

- On-site audio-visual support
- Expert, on-call IT Resource Team
- AV set-up, monitoring & troubleshooting

Innovative SaaS Technology Solutions & Best-in-Class IT Support

The Business Challenge:

Sky Ridge Medical Center®, consistently ranked one of Colorado's top 10 hospitals, was faced with tracking and maintaining reliability of their more than 8,700 non-medical technology assets. The hospital was simultaneously confronted with faulty audio-visual equipment and set-up challenges.

The Allurdata Solution:

Allurdata responded with the introduction of their proprietary BizExplorer System that tracks IT&S equipment across the hospital, reducing equipment repair-time, extending life-cycle value while meeting HIPAA requirements.

The Result:

Sky Ridge Medical Center management now leverages data and key learnings from Allurdata that enable straightforward, well-informed, strategic decisions that optimally manage assets and have maximized ROI.

The on-site AV support team delivers increased efficiency for critical meetings by ensuring maximum AV asset performance and life-cycle maintenance, a significant reduction in meeting downtime, equating to a substantial savings by eliminating non-productive staff-time overhead costs.
