

A CONNECTED COMMERCE CREDIT CARD PAYMENT SYSTEM

Welcome to the next generation of secure payment technology with worry free PCI compliance

We manage cardholder data risk and make customer payments easy - anytime, anywhere. TRANSACT gives you an advanced, easily integrated, connected commerce credit card payment system.

ORIGINAL. REINVENTED.

Multiple options make it simple for customers to buy how they want

YOUR CUSTOMER'S DATA IS SECURE

- Web - Data on your customer's browser is tokenized, removing any chance of a CC number being exposed or stolen.
- Mobile - Account information on a smartphone is tokenized and allows card on file payments.
- CardToken - Our cardtoken is universal so your customer can pay at ANY participating merchant / processor.

BEST IN CLASS SERVICE AND SUPPORT

Our 24/7 commitment to service and support is a value and a promise. We know that your business doesn't stop at 5:00 so neither do we. You can be confident in our knowledge, accessibility and quick-time resolution to any "bumps" that may occur.

WE MAKE YOUR DATA ACTIONABLE - AUTOMATICALLY

TRANSACT is integrated with ENGAGE, our marketing automation, loyalty and offers platform. ENGAGE analyzes customer buying patterns and launches precise marketing campaigns using email, SMS/text, and push notifications. ENGAGE keeps them coming back...time and time again with personalized communications that are highly targeted, timely, and designed to increase customer visits.

Monetary's Connected Commerce Platform

DESIGNED WITH YOU IN MIND

Monetary gives you revenue-generating solutions that are scalable and can be purchased together or independently based on your business needs.

Why Monetary?

- Scalable based on your business needs.
- Cutting-edge, user-friendly technology connects all customer engagement channels so information is synchronized and integrated.
- Big brand capabilities in both marketing and use of mobile apps.
- PCI compliance for payment services online, in person and mobile.
- Reliable U.S. based customer support to address any product challenges.
- Single secure repository to easily review business data.
- Automated marketing activities leverage today's communication channels to connect with your customers including text, email, on-site and push notifications.
